Report on: English language course

Introduction

The aim of this report is to discuss the strengths and weaknesses of the course and explaining whether I would recommend it or not.

Main part

Last summer my classmates and I attended a month's English language course organised by a college in my local area. This course has several different lessons like English pronunciation, grammar etc. They were great and useful because of their teachers, books and speaking practice. There were students from lots of countries like Italy or Spain so it was very interesting to talk with them about differences of ~~these~~ Europe and Russian culture. We had small classes and it was comfortable for studying there. But I found only one minus of this course: It is too much homework and sometimes I really didn't want to do it. So on the other hand it is good for practicing.

Conclusion

The English language course is a wonderful experience for student who wants to learn more about language. I absolutely recommend this course.
